MANJEET CHAPRANA

SOC ANALYST L1 | SECURITY MONITORING | SIEM | THREAT INVESTIGATION

Faridabad, Haryana, India | [Phone] | [Professional Email]
linkedin.com/in/manjeet-chaprana-651470256 | github.com/Manjeetchaprana | Portfolio: http://3.27.113.173/

PROFESSIONAL SUMMARY

Entry-level SOC analyst with internship experience at NHPC Limited and hands-on practice through independent security projects. Familiar with security alert monitoring and triage, log analysis, phishing investigation, indicators of compromise (IOCs), and endpoint/network security fundamentals. Practical exposure to Splunk, Wazuh, Windows and Linux endpoint telemetry, and Python-based phishing analysis. Seeking a SOC Analyst L1 role focused on monitoring, investigation, documentation, and incident escalation.

CORE SOC SKILLS

SOC Operations: Security alert monitoring, alert triage, log analysis, phishing investigation, IOC identification, investigation documentation, escalation fundamentals

SIEM & Detection: Splunk, Wazuh, security event monitoring, endpoint telemetry, file-integrity monitoring

Threat Investigation: Email header review, sender/Reply-To mismatch checks, suspicious URL analysis, phishing indicators

Systems & Networking: Windows, Linux, TCP/IP, DNS, HTTP/HTTPS, Wireshark

Scripting: Python, command-line tools

EXPERIENCE

Security Operations Center (SOC) Analyst Intern | NHPC Limited (Ministry of Power, Government of India)

Faridabad, Haryana | *Feb 2026 – Jul 2026*

• Monitored and triaged security alerts using Splunk SIEM, reviewing event and log data for potentially suspicious activity.

• Investigated suspicious phishing emails and documented relevant indicators of compromise (IOCs).

• Analyzed endpoint and network logs to support threat detection and security investigations.

• Participated in SOC investigation workflows and escalated findings when required.

RELEVANT PROJECTS

Wazuh SIEM Home Lab | *Wazuh, SIEM, Windows, Linux*

Built a hands-on security monitoring lab to collect and review endpoint events, security logs, and file-integrity alerts. Practised examining alerts and interpreting endpoint activity.

github.com/Manjeetchaprana/SOC-Home-Lab-Wazuh

Python Phishing Email Analyzer | *Python, Email Security, Phishing Analysis*

Developed an offline command-line tool to analyze raw email text and .eml files for common phishing indicators, including suspicious wording, From/Reply-To domain mismatches, unusual links, and risky attachment extensions. Email content is processed locally.
