PROFESSIONAL SUMMARY

Computer Science and Engineering professional with hands-on SOC internship experience at NHPC Limited. Experienced in security-alert triage, phishing investigation, endpoint and network log analysis, and incident documentation. Built security labs using Elastic Stack, Splunk, and Wazuh, along with a Python phishing-analysis tool integrated with the VirusTotal API. Building practical AWS experience through a secure static portfolio hosted with Amazon S3 and CloudFront. Seeking an entry-level Cloud Support, Cloud Engineer, or Cloud Security role.

TECHNICAL SKILLS

AWS & Cloud: Amazon S3, Amazon CloudFront, static website hosting, bucket policies, IAM fundamentals, HTTPS/TLS fundamentals, cloud access control

Security & SIEM: Elastic Stack (ELK), Splunk (SPL), Wazuh, alert triage, log correlation, IOC identification, phishing analysis, MITRE ATT&CK, incident documentation

Systems & Networking: Linux, Windows Event Logs, Sysmon, TCP/IP, OSI model, network traffic fundamentals, VirtualBox

Scripting & Developer Tools: Python, VirusTotal API, Git, GitHub

EXPERIENCE

SOC Analyst Intern — NHPC Limited (Ministry of Power, Government of India) | Feb 2026 – Jul 2026

- Monitored and triaged 15–20+ security alerts daily in Elastic Stack (ELK), distinguishing potential threats from benign activity across critical-infrastructure log sources.
- Investigated 30+ suspicious phishing emails, documented indicators of compromise (IOCs), and escalated confirmed threats through established SOC workflows.
- Analyzed endpoint and network logs to support incident detection, root-cause analysis, and incident-response activities.
- Collaborated with senior analysts on alert-handling procedures and operational security workflows.

PROJECTS

Secure Cloud-Hosted Portfolio using Amazon S3 & CloudFront

- Hosted a static portfolio using Amazon S3 and CloudFront; applied secure-access concepts and explored bucket-policy configuration, HTTPS delivery, and content distribution.

Python Phishing Email Analyzer | GitHub

- Integrated the VirusTotal API to flag suspicious URLs and attachments, supporting phishing triage and MITRE ATT&CK; mapping.

Wazuh SIEM Home Lab on Windows

- Configured Windows endpoint agents, File Integrity Monitoring, centralized log collection, and rule-based alerts.

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Junior Cybersecurity Analyst Career Path
- TryHackMe SOC Level 1 Pathway (in progress)

EDUCATION

B.Tech, Computer Science and Engineering
Echelon Institute of Technology, Faridabad — affiliated with JC Bose University of Science & Technology, YMCA | 2022–2026
